

# Modern Software Engineering

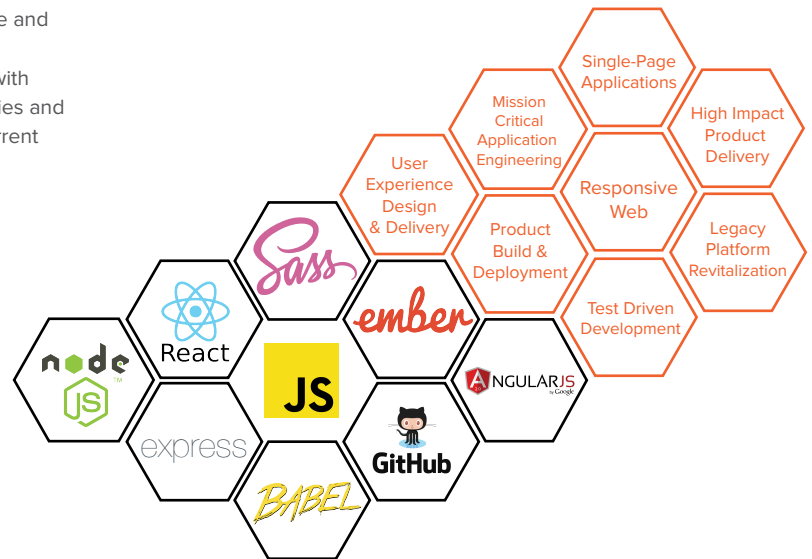

## High Velocity Product Development

Over **100** team transitions, over **65** Enterprise Product Launches & Growing

### Accelerate Web & Mobile Application Design, Development & Deployment

Our teams rapidly embed on-site with you to develop elegant, secure and highly scalable web applications and platforms using high velocity technology stacks. We specialize in building, deploying and testing with modern JavaScript frameworks and DevOps practices. We use libraries and tools to ensure that your products are continually up-to-date with current technology.

### What Do Our Clients Say

“Over the last 14 months, Interaction Designers and Front-end engineers from InRhythm helped deliver the next generation of MediaMath’s enterprise platform with HTML 5, CSS 3, Backbone and Javascript using Agile methodology.”

**Tom Craig**  
CIO  
MediaMath

“InRhythm provided a highly skilled team of front-end engineers on a short-notice. All of their engineers were talented, resourceful & professional. They integrated seamlessly with our business and created immediate value. I highly recommend them.”

**Vikram Menon**  
CTO  
Integrative Nutrition

“InRhythm has been a great partner for us over the years. They consistently deliver the right people for the job and often times within short notice. Strongly recommend them to anyone looking to grow their digital team.”

**Samir Desai**  
Director of Engineering  
Equinox

“I can’t say thank you enough to InRhythm for helping us rapidly roll-out 2 major releases in record time. Their expertise in engineering, agile practices and test driven development is unparalleled.”

**Chris Peifer**  
VP, Digital Business Development  
Barnes & Noble

### Our success is in our stories

#### Goal:

Digital replatforming of business units within a global bank

#### Impact:

- Accelerated time to market from 6 months to 3 days
- Initiated collective code ownership on a modern technology stack backed in Node, AngularJS, and Protractor
- Created a strong collaborative culture for building innovative products
